1. INTRODUCTION

In today's fast-paced digital world, personalization is crucial for engaging users and enhancing guest satisfaction. The Personalized Recommendations Module within the "WEDDING PLANNING" website is crafted to cater to each visitor's unique interests and preferences.

Behind the scenes, ReactJS, MongoDB, and Express work together to drive the recommendation system. Express manages communication between the front-end and the database, efficiently retrieving and presenting tailored recommendations for each user. This setup ensures that guests receive personalized suggestions for wedding services, galleries, and event information that resonate with their interests, making Wedding an inviting and memorable platform for every visitor.

1.1 Problem Definition

Event planning, particularly weddings, is a complex process that involves multiple vendors, service providers, budget constraints, and customer preferences. Traditional wedding planning relies heavily on manual coordination, which often leads to mismanagement, delays, budget overruns, and poor customer satisfaction. There is a need for an **automated, digital wedding planning platform** that simplifies event booking, vendor selection, and payment management while offering users a seamless experience.

1.2 Existing System

- **Lack of End-to-End Automation:** Most platforms only offer listings without real-time vendor availability or instant bookings.
- **Limited Payment Integration:** Many platforms do not support seamless digital payments or installment options.
- **Customization Constraints:** Users cannot fully customize their wedding packages dynamically.
- **Fragmented Communication:** Clients and vendors mostly communicate outside the platform, leading to delays.
- **Limited AI-Driven Recommendations:** No personalized service suggestions based on user preferences.

1.3 Proposed system

Website Navigation and User Interface : To ensure a seamless user experience, the wedding website incorporates a well-structured navigation bar with options such as Home, Service, About, Gallery, Price, Client Review, Contact, Login, and Signup. This layout is designed to allow users to easily explore different sections and gain a clear understanding of our offerings.

Image Swiper Slide : To engage visitors immediately upon arrival, a swiper slide feature has been implemented below the navigation bar. The swiper slide not only enhances the aesthetic appeal of the website but also allows users to quickly get an overview of the types of weddings and themes wedding can create.

Service Showcase : Our "Service" section on the website provides users with detailed information about the range of wedding services wedding offers. The static format of the section allows visitors to easily view all our services in one place, making it convenient for them to see how wedding can cater to their needs.

Automated Booking System – Real-time availability check and instant booking.

Vendor Management Dashboard – Admins can manage vendors, bookings, and payments efficiently.

Review & Rating System – Users can share feedback and rate services.

Contact Form for Inquiries: In the "Contact" section, a simple contact form is provided for clients to reach out with inquiries, questions, or requests for more information. This static contact form is designed for accessibility, allowing clients to start a conversation and receive personalized assistance from our team.

Aesthetic Design and Brand Identity: The wedding website is designed to convey a warm and elegant aesthetic, aligning with the celebratory spirit of weddings. Our design choices, from color palettes to font styles, are crafted to create a visually appealing and memorable experience. This website reflects wedding's commitment to quality and elegance in every wedding we plan, setting the stage for clients to trust us with their special day.

1.4 Literature Review:

Recent studies highlight the growing importance of digital transformation in event planning. Research from the IEEE Conference on Digital Event Management (2022) indicates that automation in event planning reduces the organizational workload by 40%, allowing planners to focus more on personalization and client satisfaction. A study in the International Journal of Event Planning (2023) found that automated booking systems and user-friendly interfaces increase customer engagement by 70%, as users prefer a hassle-free experience. Additionally, integrating secure payment gateways has been shown to reduce payment failures by 50%, ensuring smoother financial transactions. Case studies on popular wedding planning platforms like WedMeGood, The Knot, and WeddingWire reveal that users favor comprehensive platforms that offer end-to-end planning services, real-time vendor interactions, and transparent pricing. These studies emphasize the need for a centralized, automated wedding planning system that enhances efficiency, improves vendor-client communication, and provides a seamless event management experience.

2. SYSTEM REQUIREMENTS

2.1 Hardware and Software Requirements

Hardware Requirements:

Server Requirements:	Client Requirements:
Processor: Intel Xeon / AMD Ryzen 7 or higher	Processor: Intel i3 / AMD Ryzen 3 or higher
RAM: Minimum 16GB (Recommended: 32GB for high traffic)	RAM: Minimum 4GB
Storage: SSD 500GB+ for fast processing	Storage: Minimum 50GB free space
Network: High-speed internet connection with a secure firewall	Internet Connection: Stable broadband or mobile data
Database: MySQL, PostgreSQL, or MongoDB	Display: 1366x768 resolution or higher

Software Requirements

- **Operating System:** Windows, macOS, Linux (for development & deployment)
- **Database:** MySQL / PostgreSQL / MongoDB
- **Backend Technology:** Node.js / Python (Django, Flask) / PHP (Laravel)
- **Frontend Technology:** React.js / Angular / Vue.js
- **Web Server:** Apache / Nginx
- **Cloud & Hosting:** AWS, Google Cloud, or Azure
- **Payment Gateway Integration:** PayPal, Stripe, Razorpay
- **Security:** SSL/TLS Encryption, OAuth for authentication

2.2 Software Requirements Specification (SRS)

2.2.1 Functional Requirements

1. **User Registration & Login** – Secure authentication for users and admins.
2. **Service Listings** – Display various wedding-related services with details.
3. **Real-Time Booking System** – Allow users to check availability and book services.
4. **Custom Package Creation** – Enable users to customize event packages dynamically.
5. **Payment Integration** – Support online payments via UPI, credit/debit cards, and wallets.

6. **Admin Dashboard** – Manage users, bookings, and vendors.
7. **Review & Ratings System** – Users can provide feedback on services.

2.2.2 Non-Functional Requirements

1. **Scalability** – The system should handle high traffic and multiple users simultaneously.
2. **Security** – Implement data encryption, secure logins, and role-based access.
3. **Performance** – The system should load pages within 3 seconds.
4. **Reliability** – Ensure 99.9% uptime with cloud backup options.
5. **Usability** – User-friendly UI with responsive design for mobile and desktop users.

3. SYSTEM DESIGN

In response to the growing demand for online platforms to facilitate event planning and to create a memorable user experience, Wedding aims to build an attractive and user-friendly static website tailored for wedding services. Our goal is to provide a simple yet elegant platform that showcases our offerings and allows prospective clients to explore our services and learn more about us with ease. This chapter outlines the features of our website, explaining how they will enhance user engagement, improve accessibility, and showcase our wedding services effectively. By designing a platform that's intuitive and visually appealing, we intend to leave a lasting impression on our visitors and help them envision their dream wedding with VIVAH.

3.1 Modules of System

Welcome to Wedding Planning, your one-stop destination for a seamless wedding planning experience. Our platform is designed to simplify your journey by offering all essential wedding details in one place. We've curated a streamlined, visually engaging experience that allows you to navigate key sections effortlessly, from About Us and Services to Our Gallery, Client Reviews, and Pricing.

At Wedding, we understand the importance of privacy and security. Our simple login and signup process ensures that only authorized users access their profiles, and your personal information remains protected. Once you're logged in, you can enjoy our secure, userfriendly interface designed for smooth interaction with all content.

The Existing modules in this project are:

- Home
- Services
- About
- Gallery
- Pricing
- Booking System
- Client Reviews
- Contact
- Login
- Signup

3.1.1 Home page

As you explore our homepage, enjoy the beauty and elegance displayed in our image slider, showcasing stunning weddings from start to finish. Each image tells a story of love, joy, and celebration, offering a glimpse into the possibilities for your own special day. From beautifully decorated venues to breathtaking ceremonies, our gallery is here to inspire and guide you on your journey to the perfect wedding.

3.1.2 Services

"Our Services" section highlights the range of offerings tailored to make your special occasions unforgettable. From venue selection to find the perfect location for your event, to custom-designed invitation cards that set the tone for your celebration, every detail is crafted with precision. We ensure an engaging atmosphere with live entertainment, music, and performances that elevate the joy of your gathering. Our delectable food and drink services offer a variety of catering options to suit every palate. Preserve your memories with professional photography and videography services, capturing every cherished moment.

3.1.2.1 Venue Selection

- This service helps clients find the perfect venue for their special day. The description emphasizes wedding's ability to assist in locating ideal wedding locations, making it easier for clients to focus on other details.

3.1.2.2 Invitation Card

- wedding offers custom invitation card designs tailored to each occasion, allowing couples to send personalized invitations to their guests.

3.1.2.3 Entertainment

- For a lively wedding experience, wedding provides entertainment options such as live music, ensuring the event remains energetic and enjoyable for all attendees.

3.1.2.4 Food and Drinks

- This service caters to clients' culinary needs with delicious catering options, promising to satisfy every guest's palate with a wide range of food and drink choices.

3.1.2.5 Photos and Videos

- To capture unforgettable moments, wedding planning provides professional photography and videography services. Expert photographers are available to document each significant moment of the event.

3.1.2.6 Custom Food

- Wedding planning offers personalized food menus that cater to the specific tastes and preferences of the clients, adding a unique and memorable touch to the celebration.

3.1.3 About

At Wedding, we believe every love story is unique and deserves a celebration as special as the couple. We craft experiences that capture your journey, highlighting meaningful moments and personalizing every detail to reflect your love story. Weddings are more than events—they're the start of a lifetime of memories. Our team ensures every element, from décor to ambiance, is thoughtfully planned to create a celebration that is beautiful, emotional, and unforgettable.

3.1.4 Gallery

Our gallery is a collection of cherished moments that reflect the beauty, emotions, and traditions of weddings we've had the privilege to be part of. Each photograph captures the essence of love, joy, and togetherness, showcasing the intricate details, vibrant rituals, and candid expressions that make every celebration unique. Let our gallery inspire you with the timeless beauty and unforgettable memories that define every Wedding event.

3.1.5 Pricing

Our pricing options are tailored to meet the needs of various events, ensuring an unforgettable experience with full-service coverage. Weddings demand a grander arrangement, and our

premium package is priced at Rs.30,00,000, encompassing an exquisite range of services including lavish decorations, professional music and photography, delightful catering, and personalized invitation cards.

3.1.6 Booking system

The Booking System streamlines the process of selecting and reserving wedding services like venues, catering, decorations, and photography. It integrates real-time availability checks, ensuring users can book services without scheduling conflicts.

Users can create custom packages, selecting multiple services with dynamic pricing, offering flexibility within their budget. The system includes instant booking confirmation and secure payment integration (UPI, cards, wallets), with installment options for affordability.

A booking management dashboard allows users to track, modify, or cancel reservations, while vendors receive automated notifications. Users get digital invoices and SMS/email confirmations for transparency.

3.1.7 Client Reviews

Our clients' satisfaction is our top priority, and their feedback speaks to the quality and dedication of our service. Clients like John and Julie have expressed their gratitude, highlighting the excellence and professionalism they experienced, with words like "This service was fantastic!" echoing the sentiments of many. Their positive experiences inspire us to continue delivering exceptional service, ensuring that every celebration we plan is filled with cherished memories and joyful moments.

3.1.8 Contact

We value your interest in Wedding and are here to help you with any questions, concerns, or assistance you need. Whether you're planning an event or seeking more details about our offerings, feel free to reach out. You can contact us via email, phone, or visit one of our branches listed below. We look forward to connecting with you and helping you create unforgettable moments.

3.1.9 Login

The Login section of the wedding planning website offers users a secure and streamlined way to access their accounts. Designed with convenience in mind, this feature allows users to log in quickly using their registered email and password, giving them access to personalized wedding planning tools and saved preferences. Once logged in, users can easily manage their event details, communicate with vendors, review their bookings, and track their wedding planning progress all in one place.

For users who haven't registered yet, there's an option to Sign Up, enabling them to create an account and unlock the full range of features available on the wedding planning platform. Additionally, the login page includes a Forgot Password option, allowing users to securely reset their password if needed, ensuring they always have access to their account.

3.1.10 Signup

Welcome to Wedding planner! Sign up today to unlock a world of wedding planning features designed to make your special day perfect. By creating an account, you'll gain access to personalized services, exclusive offers, and the ability to save your favorite vendors, services, and more. Simply provide your name, email, phone number, and wedding details to get started. With wedding planning, your dream wedding is just a few clicks away. We look forward to being part of your wedding journey!

3.2 Design Approach

Use Case Diagram:

A use case diagram shows the interactions between actors (Admin, User, and Planner) and the system features, illustrating the roles and functionalities each actor can access. This helps identify, organize, and clarify system requirements for a wedding platform like "Wedding."

- Actors • Use Cases
- Features:
- Provides a user-friendly, interactive interface.
- Allows association and management of actors and their actions effectively.

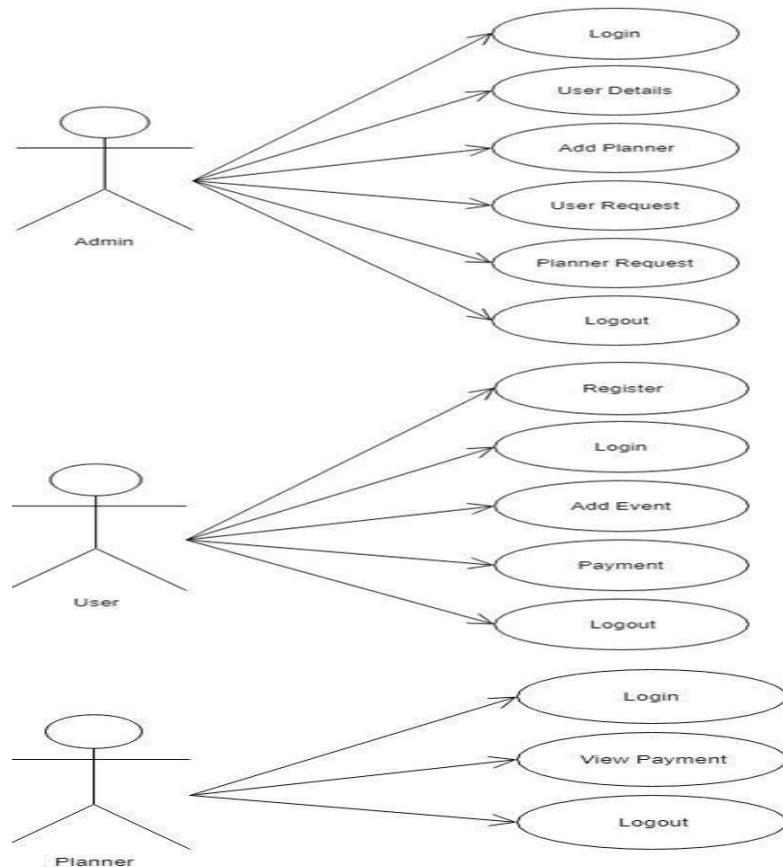

Fig .3.2.1 Use case Diagram

Class Diagram:

The class diagram represents the static structure of the wedding planner management system. It provides a visual overview of the system's classes, including attributes, methods, and the relationships between them. This diagram is essential for understanding the data model and the flow of operations among various entities, helping to design and organize the website efficiently.

- Elements of the Diagram
- Class Descriptions
- Role Class
- Permission Class
- User Class
- Venue Class
- Planner Class
- Wedding Class
- Booking Class

- Payment Class

This class diagram provides a structured and organized approach to the wedding website, facilitating effective data handling and streamlined operations for both users and administrators.

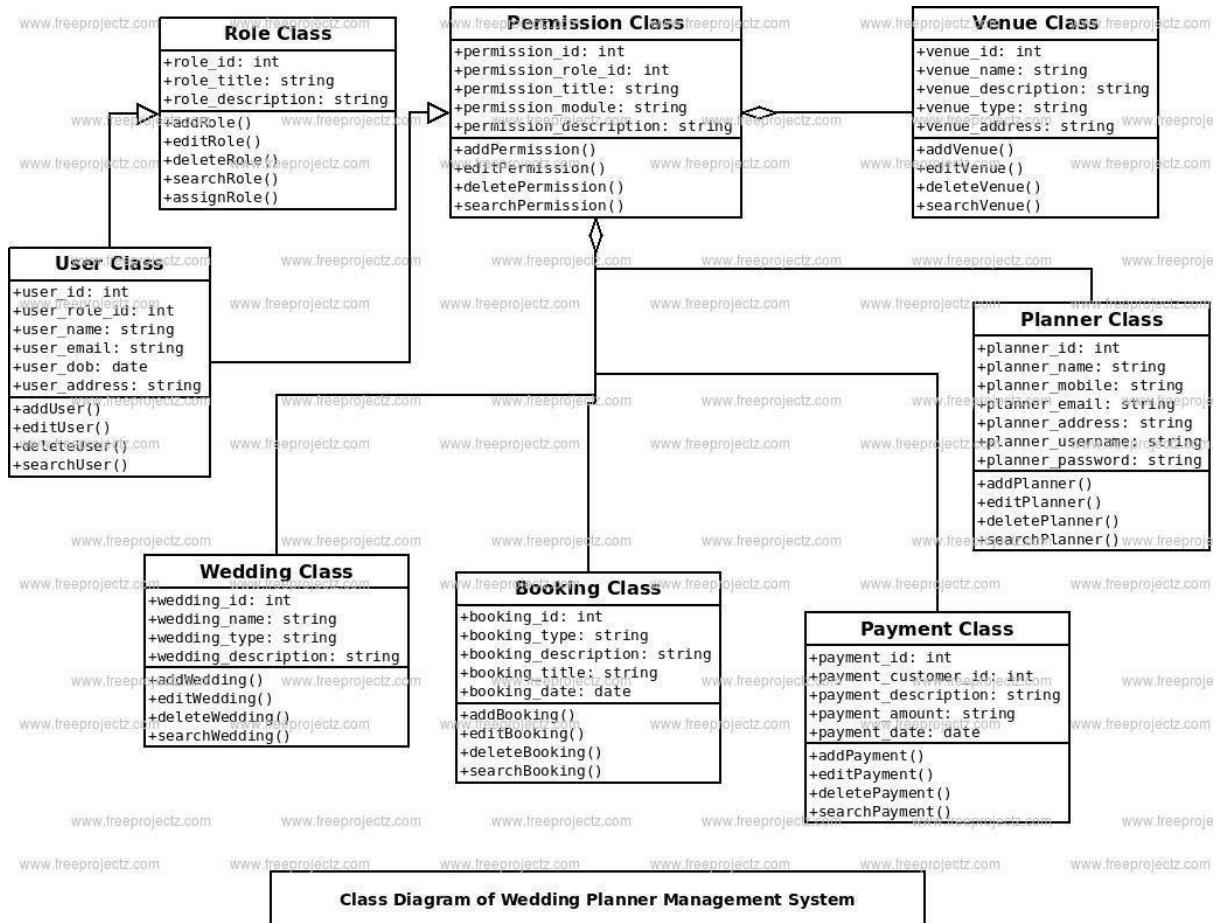

Fig .3.2.2 Class Diagram

Entity – Relationship Diagram

The ER diagram for the wedding planning website illustrates relationships between key entities like User, Login, Roles, Permission, Planner, Wedding, Booking, and Payment. Each entity has attributes such as user details, booking info, wedding specifics, and payment details. Relationships like "Has," "Manages" and "Permits" define connections between entities, facilitating role management, booking, planner assignments, and payment tracking within the VIVAH platform. This diagram is essential for structuring the database of the wedding planner system.

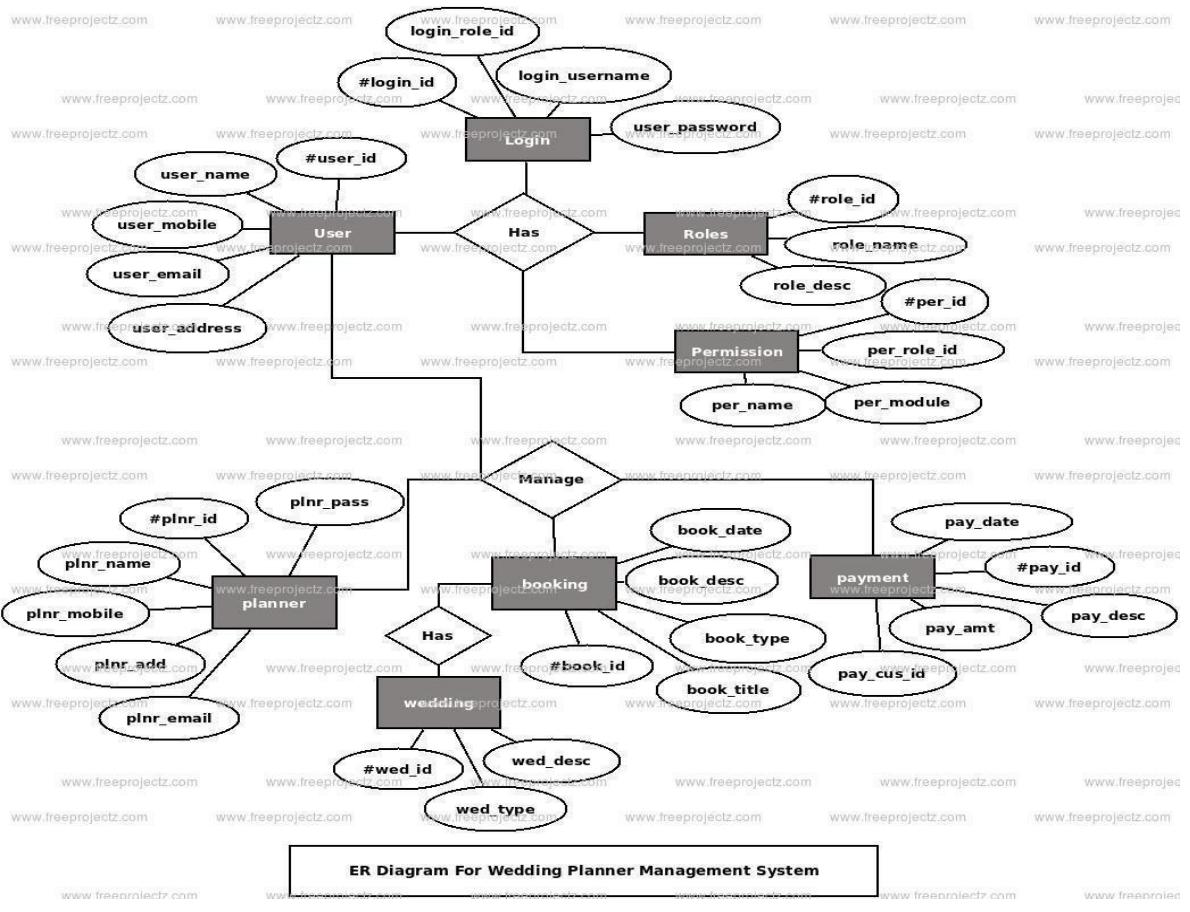

Fig .3.2.3 Entity-Relation Diagram

Testing Approach

Software testing is a crucial process to ensure that the wedding planning website meets its functional, performance, and security requirements. This process involves identifying defects, verifying that the website behaves as expected, and ensuring it is ready for users without errors. The primary goal is to evaluate the quality, accuracy, completeness, and stability of the website.

The objectives of this process include:

- Completeness:** Verifying that the website meets all functional and business requirements.
- Error-Free:** Identifying and addressing any technical bugs to ensure the website operates smoothly.
- Stability:** Assessing usability, performance, security, compatibility, and installation to provide a reliable user experience.

Testing Approach for Wedding Planning Website

- **Unit Testing:** This focuses on verifying the smallest units of code, such as individual functions or methods in the wedding Planning website. These tests help detect errors within specific features like user registration, booking management, or payment processing. Unit testing ensures that each function works as expected before integration into the full system.
- **Integration Testing:** Integration testing is conducted when individual modules are combined. The goal is to uncover faults in the interaction between integrated modules. For instance, this might involve verifying that user bookings are displayed accurately after login or ensuring payment details are linked correctly to booking data.
- **System Testing:** System testing assesses the entire wedding website in a simulated real-world environment, focusing on overall performance, server interactions, database communication, and the seamless integration of all features.

Types of system tests include:

- **Usability Testing:** Conducted from the end-user's perspective, usability testing checks if the "Wedding planning" website is easy to navigate. This ensures users can smoothly browse services, access wedding planners, and interact with various features without confusion.
- **Performance Testing:** This assesses how well the website performs under different conditions, including load times, response times, and the ability to handle multiple users simultaneously. It ensures the website remains responsive under high traffic.
- **Security Testing:** Security testing ensures the "Wedding planning" website is protected from unauthorized access and vulnerabilities. This verifies that users' data is secure and the system is resistant to common threats like SQL injection or cross-site scripting (XSS).

6. CONCLUSION

Before delving into the conclusion and future directions, it's important to reflect on the journey of creating the Wedding planning website. From the initial concept to the final execution, each stage has been a testament to creativity, collaboration, and a commitment to providing an exceptional user experience. As we reach the culmination of this project, it's worth acknowledging the challenges we faced, the milestones we reached, and the invaluable insights gained throughout the process. With this solid foundation, let us now explore the concluding thoughts and future opportunities that await wedding in enhancing and expanding its impact in the wedding planning industry.

Conclusion

In conclusion, the development and launch of the Wedding website represent a major milestone in transforming the wedding planning experience for couples in Andhra Pradesh and beyond. Through dedicated planning, collaboration, and an emphasis on user-centered design, we have successfully built an online platform that offers comprehensive wedding services, seamlessly connects users with vendors, and caters to the unique needs of each client. With its streamlined navigation, extensive vendor directory, and customizable event planning tools, Wedding is poised to become a trusted choice for couples seeking a hassle-free and personalized wedding planning journey. As we reflect on this accomplishment, we extend our gratitude to the entire team, partners, and early users who have been instrumental in bringing vivah life. Moving forward, we remain dedicated to continuous improvement and innovation, committed to providing an unparalleled planning experience for every couple.

6.1 Future Work

Looking ahead, there are several exciting opportunities for growth and enhancement for the Wedding planning website. Firstly, we aim to further improve the user experience by optimizing the platform's design, enhancing mobile responsiveness, and introducing more intuitive navigation features. We also plan to expand our service offerings by onboarding additional wedding vendors across various categories, thus providing a wider array of options to suit diverse tastes and budgets.
